PROFILE

Software Developer with **2.5+ years of experience** in building **scalable SaaS platforms, CRM systems, and enterprise web applications**. Proven ability to deliver **high-impact solutions** across **healthcare, procurement, Lead Management** and **accreditation** domains.

SKILLS

Backend: Java, Spring Boot, Spring Security, Microservices Data JPA, JUnit 5, Mockito, Rest APIs, OAuth, Docker, AWS, Redis, Kafka, JWT | Authentication and Role-Based Access Control | MongoDB, MySQL, Database Schema Design, Encryption & Data Security

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap | Responsive UI/UX Design, SEO Optimization, Dynamic Forms & Dashboards

Tools: Git, Github, npm, CI/CD With Github Actions, Cursor, Windsurf.

Other: Data Structures and Algorithms, System Design, OOPS, MVC, Logging and Monitoring.

PROFESSIONAL EXPERIENCE

Medicheck Group of Hospitals , Backend Developer

02/2025 – Present | Faridabad, India

Supplier Relationship Management(SRM)

- Developed an **end-to-end Supplier Management System** for hospitals, implementing **QR code generation and scanning**, reducing **inventory receiving time by 25%**.
- Engineered a **fully digital procurement workflow** that streamlined **100% of purchase order generation**, reducing processing time from **3 days to 4 hours**.
- Architected a **Warehouse Management System (WMS)** introducing **zone, rack, and bin-level organization** for **2,200+ SKUs**, improving inventory structure and traceability.
- Designed a secure **Role-Based Access Control (RBAC)** system with **12+ user roles** and **20+ permission levels**, strengthening operational security and controlled data access.
- Built a **sales and quotation management module** handling **250+ customer quotations**, improving sales workflow efficiency.
- Integrated **Zoho Books API** to automate purchasing, sales, and accounting workflows, synchronizing **1200+ monthly financial transactions** and reducing manual reconciliation effort by **~70%**.

Tech Stack: Spring Boot, Java, MongoDB, REST APIs, QR Code Integration, RBAC Architecture, Zoho Books API, AWS Services, Github Actions

Luneblaze , Fullstack Developer

07/2023 – 01/2025 | Faridabad, India

- Developed and maintained a **scalable SaaS accreditation platform**, handling **3,000+ documents** and optimizing accreditation workflows for **50+ educational institutions**, improving process efficiency and document management.
- Established **data backup mechanisms**, ensuring **data security** and **high availability** of accreditation documents with **99.9%** data availability.
- Optimized database performance through **strategic indexing** and **caching implementation**, improving platform efficiency and reducing document retrieval time by **35%**.
- Enabled **schools and colleges** to seamlessly **access, track, and manage accreditation documents** through a centralized digital platform educing paperwork dependency by **60%..**
- Integrated a **secure payment gateway integration** that reliably processed transactions ensuring safe and seamless payment processing with **98% success rate**.

Tech Stack: Node.js, Express.js, MYSQL, React.js, Webhooks, Razorpay / Stripe, REST APIs, JWT Authentication, AWS Serivces, Github

PROJECTS

Whatsapp Lead Managment System

- Architected a **customer-facing WhatsApp SaaS platform** with embedded business signup and self-service onboarding, reducing manual setup effort by **~90%** and enabling **real-time messaging using WebSockets**.
- Designed a **scalable messaging architecture**, enabling real-time campaigns and lead tracking while supporting **1,000+ contacts** and bulk messaging workflows.
- Built a **centralized lead management dashboard** integrating conversations, templates, campaign analytics, and **AI-based conversation summarization**, improving follow-up efficiency by **~50%**.
- Deployed a **production-ready backend on AWS** with secure **JWT authentication** and **Role-Based Access Control (RBAC)**, ensuring reliable message delivery and achieving **99.9% system uptime** through optimized background processing.

Tech Stack: Spring Boot, MongoDB, Swagger, Kafka, Redis, AWS, WebSockets, JWT, RBAC, REST APIs, Background Workers, AI/NLP Integration

EDUCATION

Bachelors of Computer Applications (BCA), Maharshi Dayanand University

07/2020 – 06/2023 | Haryana, India

Intermediate - PCM, Saheed Smarak Sr. Sec. School

03/2018 – 03/2020 | Faridabad
